

Lab 4: TCP/IP Sockets

Preparation for the Lab:

- Read the man page for, understand, and try the `socket()`, `bind()`, `listen()`, `accept()`, `connect()`, `gethostname()`, `gethostbyname()` system calls/library functions.
- Using the index, read the relevant parts of *Advanced Programming in the Unix Environment* (APUE), especially Chapter 16
- The TA will discuss source code examples.
