Lab 5: Select (I/O multiplexing)

Read the `man` page for, understand, and try the
`select(), getdtablesize()` system calls/library
functions.

• Using the index, read the relevant parts of *Advanced Programming in the Unix Environment* (APUE), especially Chapter 14.5

• The TA will discuss 1 source code examples, select.wrapper.c written by Jason Guo.

• The TA will discuss select_server.c. It was written by Bob Beck, with some changes by Paul Lu.
